Equality

By Tiller Tatenda Maringa

Equality is a painting which illustrates how men and women must be viewed as equals. The work challenges Gender Disparity and stereotypes by presenting a self explanatory composition with an egalitarian gaze.

This week we are celebrating International Women's Day, which aims to inspire and encourage women's work in every discipline, throughout the world by securing Women's Rights and shaping more tolerant and equitable societies. It is a Global effort to recognize women for their achievements with no regards to divisions; be they National, Ethnic, Linguistic, Cultural, economic or political. Maringa's concern is for the advocacy and initiation of social justice throughout the world with a driven focus on the goal of achieving gender equality as support for social integration.
